SCIENTIFIC COMMITTEE MEMBERS

President

Prof. Dr. **Jadranka Blazhevska Gilev**, Faculty of Technology and Metallurgy, Ss. Cyril and Methodius University in Skopje, N. Macedonia

Members:

Prof. Dr. **Trajče Stafilov**, Institute of Chemistry, Faculty of Natural Sciences and Mathematics, Ss. Cyril and Methodius University in Skopje, N. Macedonia

Prof. Dr. **Viktor Stefov**, Institute of Chemistry, Faculty of Natural Sciences and Mathematics, Ss. Cyril and Methodius University in Skopje, N. Macedonia

Prof. Dr. **Blažo Boev**, Faculty of Natural and Technical Sciences, Goce Delčev University, Štip, N. Macedonia

Prof. Dr. **Panče Naumov**, Division of Science and Mathematics, New York University (NYU) Abu Dhabi

Prof. Dr. **Radmila Tomovska**, POLYMAT Institute, University of the Basque Country, San Sebastian, Spain

Prof. Dr. **Vesna Rafajlovska**, Faculty of Technology and Metallurgy, Ss. Cyril and Methodius University in Skopje, N. Macedonia

Prof. Dr. **Emilija Fidančevski**, Faculty of Technology and Metallurgy, Ss. Cyril and Methodius University in Skopje, N. Macedonia

ORGANIZING COMMITTEE MEMBERS

President

Prof. Dr. **Biljana Angjusheva**, Faculty of Technology and Metallurgy, Ss. Cyril and Methodius University in Skopje, N. Macedonia

Members:

Assoc. Prof. Dr. **Vojo Jovanov**, Faculty of Technology and Metallurgy, Ss. Cyril and Methodius University in Skopje, N. Macedonia

Iva Dimitrievska, MSc, Faculty of Technology and Metallurgy, Ss. Cyril and Methodius University in Skopje, N. Macedonia

Marija Prosheva, MSc, Faculty of Technology and Metallurgy, Ss. Cyril and Methodius University in Skopje, N. Macedonia

Ivona Sofronievska, MSc, Institute of Chemistry, Faculty of Natural Sciences and Mathematics, Ss. Cyril and Methodius University in Skopje, N. Macedonia

Marinela Cvetanoska, MSc, Institute of Chemistry, Faculty of Natural Sciences and Mathematics, Ss. Cyril and Methodius University in Skopje, N. Macedonia

COORGANIZERS:

**Ministry of Education and Science of N.
Macedonia**

**РЕПУБЛИКА СЕВЕРНА МАКЕДОНИЈА
МИНИСТЕРСТВО ЗА ОБРАЗОВАНИЕ И НАУКА**

This investigation represents a novel approach for tuning the jute structure and properties using sodium periodate (NaIO₄) oxidation. The obtained results revealed that the jute fabrics exhibited an increase in the aldehyde group content (for up to 114.7%) with an increase in the NaIO₄ concentration and/or oxidation duration. Due to the decline in the cellulose lateral order index (LOI) and fiber crystallinity index after oxidation, it can be concluded that jute crystalline areas are affected by sodium periodate oxidation. Both mentioned parameters are responsible for fabric mechanical properties, so, it was expected that by decreasing the LOI and jute fibers' crystallinity, their maximum force and stiffness will decrease too. This behavior is also attributed to the fiber damage, which is the most pronounced for the fabric treated with 0.4% NaIO₄ for 120 min. Besides slightly deteriorated mechanical properties, fabrics oxidized with 0.2% NaIO₄ for 60 or 120 min and with 0.4% NaIO₄ for 60 min showed lower mass loss (6.78-12.22%) after 750 abrasion cycles compared to the raw jute (18.94%). Furthermore, oxidation led to obtaining fabrics with enhanced moisture sorption and water retention power that are inversely proportional to the fiber crystallinity. Due to the opportunity for tuning fiber structure and properties oxidized fabrics can be considered for various applications such as geo-prebiotic supports for cyanobacteria growth in biocarpet engineering, i.e., to promote a sustainable relationship between the microbiota and abiotic constituents on the degraded land surface.

Keywords: jute, sodium periodate, fiber structure, properties
